

SIZE CHART RIDING BOOTS

FOOT

The size of the foot is the one you usually wear. Refer to the European measurements.

HEIGHT

By standing position with the leg slightly bent, measure the height of the boot +/- from the floor to the highest part of the leg. To this measurement you must add 1 cm to maximum 1,5 cm as the boot will lower after wearing it.

CALF

By standing position, measure the calf in the widest point by keeping the meter in horizontal position and keeping its tension not too tight and not too large.

HOW TO MEASURE

Measurements should be taken wearing riding pants and the socks you normally use.
